

HSA Advance

Access to HSA funds when you need them

Wouldn't it be great if life happened just like we planned? Few of us *plan* to get sick or *schedule* a medical emergency. Fortunately, HSA Advance can be a real benefit when life doesn't go according to plan.

Real funds in real time.

As the name implies, HSA Advance provides you with access to your HSA funds the first day of your plan year, so you can cover health expenses immediately.¹ With HSA Advance, if you have medical expenses that are greater than the balance of your personal HSA Account, you can tap into your HSA Advance fund to help cover the cost. Automatically.

How it works

No extra steps. No extra fees. It's that easy. You don't have to take any extra steps to access your HSA Advance funds. Simply use your WEX Health Payment card at the point of service, or pay with personal funds, and request a reimbursement through the consumer portal or your mobile app. If there aren't enough funds in your HSA to cover the expense, HSA Advance funds will be used automatically to cover the difference.¹ It's just like an overdraft account at a bank—minus the fees and interest. As you make HSA contributions in the future, they are used to pay back the advance. Once the HSA Advance funds have been repaid, your HSA balance will begin to accumulate again.

Easy access to your annual HSA contribution when you need it the most. Now, that's a plan! Learn more about this benefit today.
